

197/01184 A03

REMARKS

The application comprises claims 1-38, 40-44, 46-47 and 57-62 of which claims 59-62 are new.

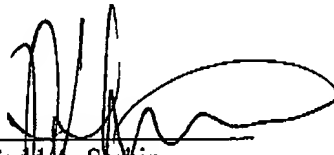

Claims 59-60 have been copied from US patent 6,725,259, with the intent of preserving the right to provoke an interference under 35 U.S.C. 135(b) at a later date. No such provoking is intended at this time.

Claim 61-62 are new claims which find support in the specification and claims as filed.

An information disclosure statement with additional art is being filed and will arrive with a few days from the date of filing of this amendment and RCE.

If the Examiner is unable to agree that the claims are all patentable, he is respectfully requested to contact Maier Fenster at toll free 1 (877) 428-5468. This number connects directly to our office in Israel. Please note that Israel is 7 hours ahead of Washington and that our work week is Sunday-Thursday.

Respectfully submitted,
Moshe KOPPEL et al.

Todd A. Serbin,
Reg. No. 45,087
